TECHNICAL INFORMATION

We can accept the ready materials in Photoshop (eps, tif, pdf), Illustrator formats in 300 dpi resolution, with CMYK colour resolution.

When planning, you should by all means pay attention to the following points: Please provide the text in the file in a curved form (outline, curve). Please pay attention to the correctness of the overprint and knock-out settings. In case of advertisements prepared in the program InDesign, the text layer should be on top. As for Photoshop eps/tif/jpg formats, we can accept in every case flattened, CMYK materials with at least 300 dpi resolution. In case of a JPG-compression, please use the setting Maximum Quality in order to minimize the distortion and fragmentation of smaller letters and thin lines. The technological limitations of the applied printing process (different paper qualities, deviations in folding, cutting and colour fitting, thin graphical elements turned into negative, letter size, black texts should be only on black plate, and avoid, in any case, the application of direct colours). Materials prepared in CorelDraw cannot be accepted.

Further expectations in case of overrunning

advertisements: Do not design useful information within 5 mm from the cutting line.

Cutting and registration signs as well as colour scales should be minimum 5 mm from the cutting line, however outside the advertisement in any case.

In case of materials with an overrunning size please leave 5 mm overrun around.

For advertisements to be prepared: Please send the photos and logos for the advertisement to be published in a 300 dpi resolution and the texts saved as word document.

INSERT

Material deadline: 10 days before on sale date.
